

## **RESOLUTION - HEALTH CARE**

**WHEREAS**, health care is a national concern and is 1/6 of the U.S. economy;

**WHEREAS**, the current proposal indicates a slide to Socialism which promises less choices, rationing of health care services, more regimentation and higher taxes; and

**WHEREAS**, current polls show that the majority of Americans are rejecting nationalized health care;

**RESOLVED**, that the North Carolina Federation of Republican Women urges our federal legislators to repeal, repair and replace the current health care legislation (H.R.3590); and instead, promote the cure to problems in the health care industry by relying more on deregulation, insurance portability, support of health-care tort reform, free enterprise, individual responsibility and market-oriented solutions.

**APPROVED** and **ADOPTED** this 1<sup>st</sup> day of May, 2010.

North Carolina Federation of Republican Women
